

Skills

Languages • HTML, CSS, Javascript, Typescripts
Frontend • React, Vue, Angular, Responsive Design, Chakra, MUI, Tailwind, AntD, GraphQL, Microfrontends
Backend • Node, Express
Methodologies • Agile, Scrum, Kanban
CI/CD & Version Control • Git, GitHub, GitLab, Azure DevOps

Experience

Frontend Developer

[OOO Udevs](#) • Tashkent

04/2023 - Present

- Built and maintained legacy and new web applications based on client requirements in a short amount of time.
- Adapted to various teams and projects simultaneously, contributing flexibly across multiple initiatives.
- Applied Agile methodologies, including Scrum and Kanban, to ensure efficient project management and delivery.

Technologies: React.js, Redux, Next.js, Vue.js, Mui, Sass, Ant-design, Chakra UI, Microfrontends architecture. [Hls.js](#), Gitlab

[Bellissimo Pizza](#) • Tashkent (Outstaff)

09/2025 - 03/2026

- Reduced Next.js build time by ~70% (6.5 min to 2 min) by implementing server-side caching for shared APIs and optimizing SSG/ISR generation across 300+ dynamic routes.
- Eliminated 700+ redundant API calls per build by implementing in-memory caching during static generation, improving CI/CD speed and reducing backend load.
- Integrated Bellissimo ordering platform into the Click SuperApp (10M+ users) by implementing WebView embedding, deep linking, session management, and multi-language error handling.
- Built a courier payroll administration system replacing manual Excel workflows with automated salary, bonuses, and branch-level reporting.
- Maintained a production React Native courier platform with background GPS tracking, WebSocket order updates, and multilingual support.
- Developed a QA Fake-GPS whitelist system enabling cross-country production testing without compromising security.

Technologies: React.js, React Native, Expo, [Next.js](#), TypeScript, Redux, Zustand, TanStackQuery, Expo, Vite, Shadcn, Auth0, Sentry, Jest, Azure DevOps.

Frontend Developer

[Kervanyol Technologies](#) • Tashkent

02/2023 - 05/2023

- Designed a high-performance ERP system (EximERP) for Foreign Economic Activity (FEA) using React and Vite, optimizing resource planning for car imports to meet international digital standards.
- Automated B2B invoicing and contract management by integrating the Didox.uz API, reducing document turnaround time and improving financial tracking accuracy.
- Integrated E-imzo digital signature authentication, ensuring secure user identity verification and document signing compliance with national encryption standards.
- Implemented real-time data synchronization via Socket.io and managed complex state for multiple user roles using Redux Toolkit, cutting processing latency by 30%.

Technologies: React, Vite, Redux Toolkit, Socket.io, MUI 5, Framer Motion, Axios, i18next, E-imzo & Didox.uz APIs, Github

Frontend Developer

[1SONIA](#) • Tashkent

10/2022 - 02/2023

- Developed 3+ multi language, cross-platform, responsive websites aimed for the company's diverse business sectors.
- Developed a robust CRM system to streamline client management, reducing task completion time by 20%.

- Increased sales efficiency by 25% through automated workflows and personalized customer insights.

Technologies used: React.js, Tailwind, Sass, GraphQL, [Chart.js](#), Github

Frontend Developer

[Zamonaviy Kommunikatsiyalar LLC](#) • Tashkent

05/2022 - 08/2022

- Built web application to automate publishing house's production and distribution of books contributing to projects within Agile methodologies.

Technologies: Vue, Vuex, Vuexy, Bootstrap-vue, Sass

Education

Computer science and Technology

Hohai University • Nanjing, Jiangsu

09/2020

- Completed 2 years of coursework before transitioning to professional work experience.

Chinese language course

Nanjing University of Computer Science and Technology • Nanjing, Jiangsu

06/2019

- Studied and became conversational in Chinese during a year abroad in China
